# ED 100 ADA Sign Series

## Signs for Educational Facilities

The ED 100 ADA Sign Series is an economical ADA solution for Educational Facilities. This system was designed for vandal prone environments by incorporating sub-surface color substrates, chemically welded recessed letters, and a scratch resistant finish.

### Standard Background and Letter Colors\*

\* Printed colors shown are for reference only and may vary slightly from actual colors. Sample chips available upon request.

### Warranty

#### Limited Lifetime Warranty

EGL warrants this product for materials and craftsmanship for the intended lifetime of the product (in the building it was originally installed). We offer a full Lifetime Warranty on text delamination. Please call for a complete warranty disclaimer.

### Process

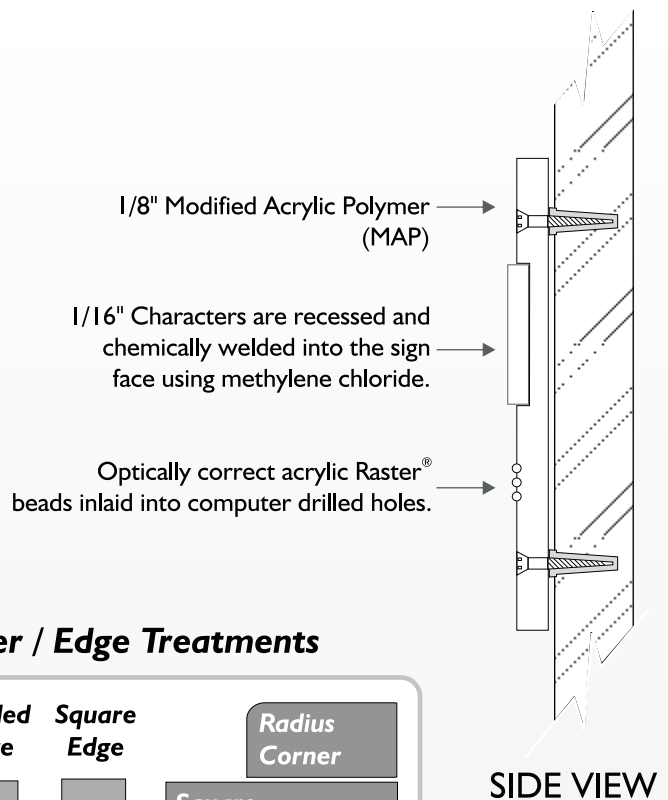

#### Chemically Welded and Recessed Letters

Sign fabricated from Modified Acrylic Polymer (MAP) suitable for interior and exterior use. Raised letters and symbols are recessed 1/32" and chemically welded using methylene chloride forming an integral part of sign face. Grade II Braille achieved by inlaying optically correct acrylic Raster® beads into computer drilled holes.

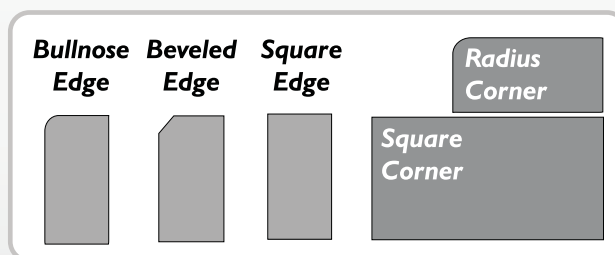

### Materials

#### Modified Acrylic Polymer

Finish	Matte / Non-Glare
Thickness	1/16" or 1/8"
Sheet Size	24" x 48"
Applications	Interior / Exterior
